UK info: Practical advice about financial issues that can affect people diagnosed with cancer, their families and friends. Including information on sick pay, benefits, help with NHS costs, grants and dealing with debt

<http://www.cancerbackup.org.uk/Resourcessupport/Symptomssideeffects/Pain/Practicalandfinancialsupport>

Info and resources for US Citizens:

Your County Department of Social Services should be able to direct you to those agencies which can provide general assistance. Check with your primary care physician about a referral to a social worker who specializes in financial matters. They are usually incredibly well connected with all of the assistance agencies and may be able to help you with paperwork, etc. Call your local chapter of the American Cancer Society and see if they can give you some referrals. If you can't find the telephone number for your local chapter call 1-800-ACS-2345. Contact all your local and state officials regarding

welfare and general assistance programs.

From the NCI: Financial Assistance for Cancer Care

http://cis.nci.nih.gov/fact/8_3.htm

Social Security Disability Help (US)

By helping people through the process, and offering free case evaluations, we feel we do our part in getting people the benefits they deserve so that they can live somewhat comfortably and with less financial worry. We are currently trying to raise awareness that you or a loved one can be considered for Social Security Disability benefits if you have been diagnosed with a disabling condition.

National Cancer Coalition

NCC's mission is to reduce the suffering of cancer patients and their families by meeting their unfulfilled needs. NCC provides medical and financial relief, research and educational programs throughout the world in an effort to improve the cancer patient's quality of life.

The Partnership for Prescription Assistance

<http://www.cancercareinc.org/patients/plinksfinancial.htm>

brings together America's pharmaceutical companies, doctors, other health care providers, patient advocacy

organizations and community groups to help qualifying patients who lack prescription coverage get the medicines they need through the public or private program that's right for them. Many will get them free or nearly free. Patients can determine which programs they may be eligible for by answering questions and using the online application wizard.

Free medications

It also has a co-pay relief program.

From Cure Magazine: Help for Patients

The costs of cancer treatment can quickly become overwhelming, even if you have medical insurance. Patient assistance programs are offered by various companies, nonprofits and government agencies to help patients with little or no insurance get access to drugs and money for other expenses.

If you're interested in enrolling in a patient assistance program, you must first gather information, usually from your doctor or the maker of the specific drug you're taking for which you need assistance. A doctor must be involved in the process because the physician writes the prescription for the medication.

Many patient assistance applications will require proof of income, including tax returns, social security income, interest and retirement to prove financial burden and to meet income requirements. Faxing the information often speeds up the process. In addition to many state governments, numerous organizations provide information on patient assistance programs, including the ones listed below.

Amgen Reimbursement Connection

www.amgen.com/patients/assistance.html

For patients who are uninsured or underinsured and who have limited financial resources; based on insured status and income level. Drugs in this program include Aranesp® (darbepoetin alfa) and Neulasta® (pegfilgrastim). 800-272-9376
